WORK EXPERIENCE

Web Development & IT Support Intern

SPLACE BPO

📅 July 2025 - July 2025

📍 Davao City, Philippines

- Developed a responsive HR rating system using the MERN stack (MongoDB, Express.js, React.js, Node.js) and styled with Tailwind CSS to streamline performance evaluations.
- Collaborated with cross-functional teams to troubleshoot software issues and maintain hardware infrastructure, improving system reliability.
- Assisted production teams with cable management, lead mining, and system reformatting to support operational efficiency.
- Managed lead distribution workflows as Vici Controller, ensuring accurate data flow and optimized task assignment.

Key Projects

Harvestify

Full-Stack Developer (Thesis Project)

- Architected a scalable Agri-Marketplace with **React.js** and **Tailwind CSS**, delivering a responsive UI tailored for small-scale farmers.
- Integrated **two-factor authentication (2FA)** using Speakeasy and Passport; secured RESTful endpoints with **Node.js** and Express.
- Managed client-side state with **Redux** and React Context API; enabled real-time messaging and dispute resolution via socket.io.
- Built interactive dashboards and analytics visualizations using **ApexCharts** and **Chart.js**.
- Implemented **multilingual support** (English, Tagalog) through i18next for inclusive user experiences.

FarmFuture

Full-Stack Developer

- Developed a **Progressive Web App (PWA)** using React.js and Tailwind CSS for real-time and historical crop-price data with automated alerts.
- Consumed RESTful APIs built in **Node.js** and Express to power dynamic data fetching and notifications.
- Enabled live chat functionality with **socket.io** and orchestrated state management with **Redux**.
- Created actionable data visualizations with **Chart.js** and **ApexCharts** to guide trading decisions.

CAREER

OBJECTIVE

Web Developer skilled in React.js, Tailwind CSS, and Node.js, passionate about crafting responsive, component-based user interfaces. Seeking a Junior to Mid-Level Front-End Developer role to leverage REST API integration, state management with Redux, and real-time features via socket.io to build scalable and user-centric web applications.
