WORK EXPERIENCE

Web Development & IT Support Intern

SPLACE

📅 July 2025 - July 2025   📍 Davao City, Philippines

- Designed and developed web-based solutions, including an HR rating system
- Supported IT infrastructure through software troubleshooting, hardware maintenance, and production team assistance
- Delivered technical aid for operations like cable management, lead mining, and system reformatting
- Oversaw lead distribution as Vici Controller for optimized workflow.

PROJECTS

Harvestify

Full-Stack Developer | Thesis Project

- Designed and developed **Harvestify**, a web-based Agri-Marketplace platform supporting small-scale farmers and traders in Davao Oriental.
- Aimed to eliminate middlemen and improve market access, profitability, and transparency in agricultural trade through direct farmer-to-trader transactions.
- Implemented key features including **2 factor authentication**, digital product catalogs, dynamic pricing, harvest scheduling, **real-time messaging** with Socket.io, dispute resolution, and **multilingual interface** using i18next.
- Built using React.js, Redux, Node.js, Express, Socket.io, i18next, and RESTful APIs, delivering a scalable and responsive full-stack solution tailored for the local agriculture sector.

FarmFuture

Full-Stack Developer

- Developed a web-based platform to deliver real-time and historical crop price trends for farmers in Mati, Davao Oriental.
- Implemented interactive dashboards, data visualizations, automated alerts, and mobile-friendly access for improved decision-making.
- Built using React.js, Redux, Node.js, Express, Socket.io, and RESTful APIs

CAREER OBJECTIVE

Entry-level Web Developer with a strong foundation in JavaScript, React.js, and Node.js, driven by a passion for building polished, user-first experiences. Experienced in debugging complex workflows, optimizing swipe functionality, and integrating secure backend systems using 2FA and Passport. Adept at collaborating in agile teams and continuously learning emerging tools like Framer Motion, ApexCharts, Chart.js, and shadcn. Eager to contribute scalable, accessible solutions that reflect thoughtful design and empower users through innovative web technologies.
